

Choose 3 digit keys and 2 operation keys e.g.

You can always use the = key

Can you make all the numbers from 1 – 20 using only these keys?

You can use the keys as often as you want each time.

I used these keys:

### Things to think about...

Can you use the difference between the numbers to help?

Can the way you made a number before help you this time?

### Extra challenge

What if you 'Take 4' and use 2 digits and 2 operations?
